This three day international event will explore new research into TB detection, treatments and vaccination as well as new development in controlling and preventing TB infection.

We welcome abstracts for oral and poster presentation and will have an open oral and poster session where abstracts can be sent relating to any aspect of TB research.

This event has CPD accreditation

www.regonline.co.uk/TB2015

Hashtag: #TB2015
Contents

Day 1: Treatment and Control ........................................................................................................ 5

Introduction by the Chair ................................................................................................................. 5

"Dangerous" M. tuberculosis genotypes their transmission and acquisition of drug resistance - implications for treatment and infection control .................................................................................. 5

MDR-TB - excellent treatment outcome in the Netherlands - teamwork with all stakeholders ................................................................. 5

Acute minimally invasive surgical treatment in Pott’s diseases .................................................................................. 5

Oral Presentations .................................................................................................................................. 5

TB screening and biologic therapy ........................................................................................................ 5

The role of surgery in active TB ............................................................................................................ 5

Design, Syntheses and Studies of New Potent and Selective Anti-tuberculosis Agents Based on Imidazopyrine Cores ..................................................................................................................... 5

Oral Presentations .................................................................................................................................. 5

Immunoprophylactic and immunotherapeutic roles of different immunomodulators during the disease process ................................................................................................................. 5

Agenda .................................................................................................................................................. 5

Day 2, Morning Session: Disease Progression .................................................................................. 6

Introduction by the Chair ................................................................................................................. 6

Investments in tuberculosis research 1997-2013 - an analysis of the UK research portfolio .................................................................................. 6

The immunopathogenesis of tuberculosis in Asian Elephants (Elephas maximus) .................................................................................. 6

Oral Presentations .................................................................................................................................. 6

Day 2, Afternoon Session: Global Challenges .................................................................................. 6

Introduction by the Chair ................................................................................................................. 6

Gender Disparity in Tuberculosis: Global Health Issue and its Challenges .................................................................................. 6

Mycobacterial ParE2 : A DNA Gyrase inhibitor and its role in mycobacterial persistence .................................................................................. 6

Synthesis and evaluation of potential inhibitors of M.Tb. bearing aminoheterocyclic cores .................................................................................. 6

Day 3, Morning: Detection, Prediction and Prognosis ...................................................................... 7

Introduction by the Chair ................................................................................................................. 7

Vaccination of badgers against bovine tuberculosis ........................................................................ 7

Predictors and prognostic indicators of stroke in CNS tuberculosis .............................................. 7

Does HIV modify the association between hyperglycaemia and active tuberculosis? ............... 7

A fragment based approach to develop inhibitors of HSAD- an enzyme encoded in a cholesterol catabolism operon in mycobacterium tuberculosis .................................................................................. 7

VPM1002 a new prime vaccine on the horizon ............................................................................... 7

Discussion Session for all the Speakers .......................................................................................... 7

About the Speakers ............................................................................................................................. 8

Day 1 .................................................................................................................................................. 8

Richard Anthony .................................................................................................................................. 8

Tjip S van der Werf ............................................................................................................................. 8

Khaled M. AlKattan ............................................................................................................................ 8

Marvin J. Miller .................................................................................................................................. 8

Day 2 .................................................................................................................................................. 8

Discussion Session for all the Speakers .......................................................................................... 8

About the Speakers ............................................................................................................................. 8

Day 2 .................................................................................................................................................. 8

Richard Anthony .................................................................................................................................. 8

Tjip S van der Werf ............................................................................................................................. 8

Khaled M. AlKattan ............................................................................................................................ 8

Marvin J. Miller .................................................................................................................................. 8
Discussion Sessions .............................................................................................................. 10
Session breaks .................................................................................................................. 10
Lunch .................................................................................................................................. 10
  • All the chicken in our lunch buffet is Halal ............................................................... 10
  • We have a number of dishes that are gluten free .................................................... 10
  • We have a range of vegetarian dishes which are separated from the meat and fish dishes ............................................................................................................. 10
Frequently asked questions about our events ................................................................. 10
Is the delegate list available? ............................................................................................. 10
Can I have the speakers slides? .......................................................................................... 10
Can I have a notepad? ......................................................................................................... 10
How can I keep up to date with Euroscicon Events? ....................................................... 11
I don't want my photograph on any Euroscicon promotional material............................ 11

About the Speakers

Day 1

Richard Anthony, Royal Tropical Institute, Amsterdam, The Netherlands
With more than 10 years research experience on tuberculosis treatment and the development and implementation of tuberculosis diagnostics Richard Anthony currently leads a group of researchers at the Royal Tropical Institute (KIT) in Amsterdam who are actively working on the diagnosis, identification, and detection of antibiotic resistance in mycobacterial species.

Tjip S van der Werf, MD PhD, pulmonologist, Professor of Medicine, Infectious Diseases Service, Dept of Internal Medicine, and Pulmonary Diseases & Tuberculosis, UMCG, University of Groningen, Groningen, The Netherlands

Khaled M. AlKattan, Professor of Surgery Dean, College of Medicine, Alfaisal University, Saudi Arabia
Professor Khaled Manae Al-Kattan, Dean College of Medicine, Alfaisal University and Consultant Thoracic Surgery and lung transplant at King Faisal Specialist Hospital & Research Centre. He was a graduate from King Saud University 1983, got his FRCS from Edinburgh with a gold medal in 1988. Appointed as an assistance professor at KSU in 1989, Associate professor in 1995 and then a full professor in 2000. He served as the director of continuous medical education at the college. He was a co-founder of both the Saudi thoracic society and Pan Arab Chest Society. He is the Middle East regent for the European Society of Thoracic Surgery. He is a member of many international societies and sits as a senior editor for the Annals of Thoracic Medicine journal. He is in the editorial board and reviewer of most of the international thoracic surgery journals. Have extensive research and publication in his field.

Marvin J. Miller, George and Winifred Clark Professor of Chemistry and Biochemistry, University of Notre Dame, Notre Dame, IN, USA
Marvin J. Miller, the George and Winifred Clark Professor of Chemistry and Biochemistry at the University of Notre Dame, Notre Dame, received his undergraduate training at North Dakota State University and his Ph.D. in organic chemistry from Cornell University. After NIH sponsored postdoctoral research at UC Berkeley, he established his independent research program at Notre Dame, focusing on synthetic organic chemistry, methodology and applications to design, syntheses and studies of biologically interesting molecules. He has authored nearly 300 publications and mentored more than 150 graduate students, postdoctoral fellows and research associates. He is a cofounder of Hsiri Therapeutics.

Day 2

Michael Head, Research Associate, University College London, UK
Michael Head is a research associate at UCL. He is co-founder of the 'Research Investments in Global Health' (ResIn, www.researchinvestments.org) initiative and has run the Infectious Disease Research Network (www.idrn.org) since 2004.

Jennifer (Jaime) Landolfi, DVM, PhD, Diplomate ACVP University of Illinois, Zoological Pathology Program, US
Dr. Landolfi is a board certified veterinary pathologist (Diplomate American College of Veterinary Pathologists, 2006) with the University of Illinois Zoological Pathology Program. Dr. Landolfi has a DVM from the Virginia-Maryland Regional College of Veterinary Medicine (2003), and completed her PhD in Pathobiology at the University of Illinois, Urbana-Champaign in 2013 studying the immunopathogenesis of elephant tuberculosis. Her studies utilize molecular techniques to characterize and compare immune responses between tuberculosis positive and negative elephants in order to elucidate host contributions to disease and explain susceptibility.
Manish Gupta, Teri University and Bsl-3 Lab, School Of Biotechnology, Jawaharlal Nehru University, New Delhi, India
Manish graduated in Microbiology Hons. from Calcutta University in 2006 followed by a Masters course in Biotechnology from Bangalore University, India in 2008. He started his research career as a junior research fellow in ICGEB, India and worked on decoding the Mycobacterial cell wall components. In 2011, he got enrolled to Ph.D programme in TERI University, India and have extensively worked in BSL-3 facility of Jawaharlal Nehru University. His doctoral research includes studying the parDE TA loci of M. tuberculosis. Apart from that he is still working on Mycobacteril cell wall components, their use as potential adjuvants and development of Nano & Microparticle based vaccine delivery systems against Tuberculosis.

Michel Baltas, CNRS LSPCMIB UMR 5068, CNRS, France
He was graduated (1981) from the University Paul Sabatier of Toulouse, France. Performed two doctoral works on inhibitors of lignification process in plants, (1981-1984 grant and 1984-1987 for Roussel Uclaff INC). He joined (10/1986) the "Centre Nationale de la Recherche Scientifique" (CNRS) in the current laboratory. In 1996 he performed a 14 months research work with Prof. A. Vasella at ETH, Zürich, Switzerland (glucosidases inhibitors). During the ’90s, he developed new synthetic methods of elaboration of polyols and aminoalcohols systems possessing three or more contiguous asymmetric centers possessing antibacterial or antitumoral activities. He develops methods for elaborating valuable scaffolds and, through chemical diversity, bio inspired (or not) (poly)aromatic derivatives with enhanced biological activities (tuberculosis, cancer, cardiovascular). In 2005 became Director of Research and in 2007 Director of the laboratory.

Day 3

Mohammad Wasay, MD, FRCP, FAAN, Aga Khan University, Karachi, Pakistan
The career of Dr. Wasay is of an excellent clinician, superb teacher, enthusiastic researcher and an advocate of Neurological health. He graduated from Dow Medical College and completed Internal Medicine residency from West Virginia, Neurology training from UT Southwestern, Dallas and a Neuroimaging Fellowship from State University of New York. He received Lester Bryant Award during his medicine residency for his work on “gait and leukoariosis”. He received Victor Rivera Award during his Neurology residency for his work on “St Louis encephalitis”.

He has been Director of Neurology Residency training program at AKU and has trained ten Neurologists (FCPS passed) under his supervision. He was awarded Distinguished Teacher Award by Pakistan Society of Neurology (2005), Outstanding Teacher Award by Aga Khan University (2005) and Teachers Recognition Award by American academy of Neurology (2006).

Sarah Lou Bailey, London School of Hygiene and Tropical Medicine, UK
Dr Sarah Lou Bailey is a Wellcome Trust Clinical Research Fellow undertaking the Clinical PhD Programme in International Health at the London School of Hygiene and Tropical Medicine. She is a physician part-way through her specialty training in Infectious Diseases. Her current research explores associations between diabetes mellitus and tuberculosis in sub-Saharan African populations and is based with Zambart, a research organisation in Lusaka.

Elena Polycarpou, Faculty of Science, Engineering and Computing Kingston University London, UK

Leander Grode, Vakzine Projekt Management GmbH, Hannover, Germany
Dr. Leander Grode joined VPM in May 2003 as project manager. Since April 2008 he has been responsible for Business Development and since 2013 he is Chief Scientific Officer at VPM.
Discussion Sessions

The discussion sessions are an opportunity for informal questions and answers. This is an ideal opportunity to get advice and opinion from experts in this area. This session is not for questions about specific talks, which can be asked after the speakers session, but for discussing either general topics or specific issues.

There are three ways you can ask questions:

1. Before the session you can submit your question to Euroscicon staff at the registration desk.
2. Before and during the session you can submit a question or comments, by email, which will be provided on the day of the event.
3. During the session you can put your hand up and join in.

Session breaks

All breaks and registrations will take place in the exhibition area where there will be lunch and refreshments.

Please try to visit all the exhibition stands during this event. Not only do our sponsors enable Euroscicon to keep the registration fees competitive, but they are also here specifically to talk to you.

Lunch

- All the chicken in our lunch buffet is Halal.
- We have a number of dishes that are gluten free.
- We have a range of vegetarian dishes which are separated from the meat and fish dishes.

Frequently asked questions about our events

Is the delegate list available?

Yes this is available to everyone who attends the event and our sponsors. It is available in real time. To access the list please just log into your registration details or use the QR code on right of the agenda card which is provided on the day of the event. You will not be included in this list if you have opted out and you can do this by logging into your registration details. This list will not be sold or ever give out to third parties.

Can I have the speakers slides?

We cannot give out the slides from our speaker’s presentations as they are deleted immediately after each event. If you require a particular set of slides please approach the speaker. We will however have a meeting report and you will be emailed when this report is published.

Can I have a notepad?

Notepads and pens are provided in the delegate bags and at the registration desk.
How can I keep up to date with Euroscicon Events?

To keep updated on our events and other Life Science News, please sign up for our newsletter at www.eurosciconnews.com

I don’t want my photograph on any Euroscicon promotional material

Please let our tech person know

Is there WIFI?

Yes, please ask registration for log in details

Can I have a CPD certificate?

CPD certificates will be available in the exhibition hall after lunch

Please remember that EuroSciCon is a small independent company with no subsidies from society memberships or academic rates for venues. We try to be as reasonably priced as possible and our delegate rates are substantially lower than comparable commercial meeting organisations.
